ROBINSON CONTRACTING COMPANY LTD

CAPABILITY STATEMENT 2026

Turnkey project delivery.
Electrical at our core.

Complete projects for clients of every size, across the public and private sectors in England and Wales.

OFFICES & COMMERCIAL · EDUCATION · HEALTHCARE · INDUSTRIAL
RETAIL · PUBLIC SECTOR · DEFENCE · JUSTICE

WHO WE ARE

One accountable partner for projects of every size, in every sector.

Robinson Contracting Company Ltd is a Gloucester-based contractor delivering complete commercial and industrial projects across England and Wales.

We deliver complete projects for main contractors, public-sector clients, developers and businesses. We take responsibility for the full package — pre-construction, design coordination, installation, testing, commissioning and handover — with electrical engineering at the core of everything we deliver.

Our clients rely on us for safe, compliant and well-managed delivery in offices, shops and hospitality venues, schools and nurseries, healthcare settings, industrial sites and public buildings.

Founded in 2022 by Director Macauley Robinson, originally trading as Robinson Electrical Contractors, the business has grown through a broad range of projects — from commercial fit-outs and refurbishments to schools, charities, Ministry of Defence housing and public buildings.

WHAT WE DELIVER

End-to-end delivery. One accountable team.

One contractor responsible for the full package — from design and programming through installation, testing and handover — so there are no gaps between packages and no surprises.

01

Turnkey project delivery

Complete commercial and industrial projects delivered under one contract, with a single point of responsibility from pre-construction to handover.

02

Electrical engineering

Design, installation, testing and certification of electrical systems by qualified, ECS-carded electricians working to BS 7671.

03

Construction & fit-out

Refurbishment and fit-out of offices, education, public and commercial buildings, coordinated around occupied and operational spaces.

04

Project management

Planning, programming, resourcing and reporting led by SMSTS-qualified contracts managers who stay with the project from start to finish.

05

Electrical design & drawings

Design coordination, layouts and as-built drawings that support compliant installation and a complete handover record.

06

Health & safety management

Project-specific RAMS, inductions and site supervision on every project, with safety planned in from day one.

ELECTRICAL ENGINEERING AT OUR CORE

Specialist electrical capability inside every package.

Electrical engineering is where the business began, and it remains the core of every project we deliver.

Installation & rewires

- Full and phased electrical rewires
- New-build and fit-out installations
- Power, lighting and distribution
- Small power and data containment

Lighting & controls

- LED lighting upgrades
- DALI addressable lighting controls
- Wireless lighting control systems
- Emergency lighting

Inspection & compliance

- Electrical installation condition reports (EICRs)
- Remedial works
- Consumer unit and distribution upgrades
- Testing, certification and handover records

Security & communications

- CCTV
- Communications and data
- Door access control
- Night and weekend working in live buildings

SECTORS

Experience across the public and private sectors.

Every sector has its own access, vetting, programme and compliance requirements. Our teams plan for them from day one.

01 Offices & Commercial

Fit-out, refurbishment and lighting upgrades in occupied workplaces, including out-of-hours working.

02 Education & Early Years

Schools, colleges and nurseries, delivered around term time with safeguarding-led site rules.

03 Public Sector & Local Authority

Civic offices, community buildings and public estates delivered to public-sector procurement and compliance standards.

04 Healthcare

Phased works in clinical and care settings, with isolations planned so services continue safely.

05 Industrial

Power, lighting and distribution for industrial and logistics facilities, planned around operations.

06 Retail & Hospitality

Fit-out, refurbishment and upgrades delivered around trading hours.

07 Defence & MOD

Rewires and upgrades on Ministry of Defence housing and vetted-access sites.

08 Justice & Courts

Works in live court and tribunal buildings, planned around the court timetable.

SELECTED PROJECTS

Projects for clients in every sector.

From occupied offices and live public buildings to schools, warehouses and charity head offices, every project is planned around the people who use it.

INDUSTRIAL

Warehouse Office Fit-Out

Blandford, Dorset

New offices and store rooms inside an operational distribution warehouse in three weeks: electrical, data, fire alarm alterations and supplies to air conditioning.

COMMERCIAL

SOHO Coffee Co.

Cheltenham head office & UK stores

Around three and a half years of inspection and testing, LED lighting upgrades and maintenance at the head office, plus reactive support to stores nationwide.

CHARITY

Charity Head Office

Dorset

Complete electrical installation for the new head office of a national charity.

PUBLIC SECTOR

Palestra House, Transport for London

London

LED lighting upgrade with a wireless control system, phased through an occupied office building.

EDUCATION

School Data Containment

New containment system across a school roof after data cables were found unsupported and unprotected.

JUSTICE

Woolwich Crown Court

Woolwich, London

Full LED lighting upgrade with a DALI addressable lighting control system.

JUSTICE

Poole Law Courts

Poole, Dorset

Full electrical rewire including CCTV, communications, data and door access control.

JUSTICE

Bath Magistrates' Court

Bath

New door access control system installed on night shifts while the building stayed open.

Further justice projects include Taunton Crown Court and Havant Court & Tribunal Centre.

HOW WE DELIVER

Four principles on every project.

01

Safety without compromise

Project-specific RAMS, SMSTS-led site management and carded operatives on every project.

02

Programme certainty

Planned resourcing, phased sequencing and shutdown planning agreed before we mobilise.

03

Quality assured

Inspection, testing and certification at every stage, with full documentation at handover.

04

Transparent partnership

One point of contact, clear reporting and early engagement from tender to completion.

FROM ENQUIRY TO HANDOVER

01 **Pre-construction**

Review of drawings, specification and site constraints; clarifications, programme and a clear, fully qualified proposal.

02 **Planning & mobilisation**

Phasing, shutdowns and access agreed with the client; RAMS, inductions, vetting and resourcing in place before work starts.

03 **Delivery**

A named contracts manager leads the works on site, with regular progress reporting and early visibility of any issues.

04 **Testing & commissioning**

Inspection, testing and commissioning of every system, with defects closed out before handover.

05 **Handover**

Certification, as-built information and O&M documentation, delivered complete and on time.

Independently assessed. Ready for public-sector procurement.

GOLD
CONSTRUCTIONLINE

Constructionline Gold

The highest level of Constructionline membership. Our Gold membership includes our SSIP-recognised health and safety assessment and pre-qualification against the PAS 91 standard questionnaire (PQS), giving clients and main contractors assurance that we meet the requirements of public and private-sector procurement.

SMSTS site management

Our site management holds the CITB Site Management Safety Training Scheme qualification.

ECS-carded electricians

Electrotechnical Certification Scheme cards appropriate to each operative's grade.

CSCS-carded operatives

Construction Skills Certification Scheme cards required for each role.

Security vetting

BPSS checks arranged for operatives working on secure and government sites.

Training

Asbestos awareness, manual handling and access equipment training, including IPAF where required.

Insurance

Comprehensive cover for commercial and industrial works. Certificates available on request.

Company policies

Health & Safety · Quality · Environmental · Equality, Diversity & Inclusion · Modern Slavery Statement · Carbon Reduction Commitment · Privacy. Available at robinsoncontractingcompany.co.uk/policies

LEADERSHIP

The people accountable for delivery.

MR

DIRECTOR

Macauley Robinson

Founded the business in 2022 and leads its strategy, client relationships and commercial direction. An electrician by trade, he has built Robinson Contracting Company into a turnkey contractor delivering complex projects across England and Wales.

OB

CONTRACTS MANAGER

Owen Butler

Leads site delivery on major projects, providing SMSTS-qualified site management, coordinating teams and keeping works safe, on programme and to specification.

HA

CONTRACTS MANAGER

Henry Avery

Manages client relationships, tendering and project delivery, working with main contractors and clients from pre-construction through to handover.

SOCIAL VALUE

Adding value beyond the project.

Local employment

We recruit locally wherever possible on the projects in each area.

Local supply chain

Local subcontractors and suppliers wherever we can.

Health & wellbeing

A culture where anyone can raise a concern.

Environment

Reducing waste and helping clients cut energy use through efficient lighting and controls.

Fair business

Fair treatment of our workforce and supply chain, and zero tolerance of modern slavery.

Community

Supporting local causes and charities where we live and work.

WORK WITH US

Bring us in early.

Share your drawings, specification or tender documents and our team will respond with a clear, fully qualified proposal.
